

The London Gazette.

Published by Authority.

From Tuesday January 15, to Saturday January 19, 1754.

Copenhagen, December 25.

THE King has appointed M. Baner, one of the Burgomasters of Altena, to be one of the Counsellors of the Court of Justice; and M. Widtkier is appointed one of the Counsellors of the Chancery. His Majesty has likewise appointed M. Valentiner to be Grand Master of the Forests and Waters of the Dutchy of Sleswick. M. Bronsdorff, Captain of a Company in the Regiment of Foot of Holstein, has obtained Leave to quit the Service, and is succeeded by the young Count de Nostitz. The Ships bound from this Port for China and Tranquebar, are ready to put to Sea, and only wait for a favourable Wind to proceed on their Voyage. The great Quantity of Snow that has fallen in these Parts within this Week past, has rendered the Road from hence to Hambourg, almost impassable. We have received an Account, that the large and commodious Edifice, which Count Moltke, Grand Marshal of the Court, lately caused to be erected for carrying on a Woolen Manufacture at Bregentwedt, is entirely reduced to Ashes, with all its Outhouses and Materials; the Loss occasioned by this Fire, is reckoned very considerable.

Brunswick, Dec. 26. Prince Ferdinand, Brother to the Duke our Sovereign, who arrived here lately from Copenhagen, set out from hence on Saturday last, on his Return to Berlin.

Gotha, Dec. 28. Baron Nitschwitz, actual Privy-Counsellor to the Duke our Sovereign, and President of the Chancery, died here last Week, generally regretted.

Florence, Dec. 28. Dispositions are making here, for the new Company composed entirely of Tuscans, to enter upon the Administration of the publick Revenues at the Beginning of the Year; and the French Farmers are settling their Accounts, so as to be able to leave the Country in a few Months after their Administration is over.

Dresden, Dec. 30. Prince Clement, who is perfectly recovered from the Small-Pox, appears again in Publick; but the Hereditary Prince is

so much indisposed, that he is obliged to confine himself to his Apartment. The Hereditary Prince of Modena arrived here a few Days ago from Vienna incognito, under the Name of the Marquess de Novi, and is treated at Court with great Marks of Distinction. The King has appointed Mess. Hausius and Lindeman, to be Counsellors of the Chamber of Finances.

Berlin, Jan. 1. On Wednesday last the King, accompanied by Prince Ferdinand of Brunswick, and several General Officers, arrived in this City from Potzdam, in order to be present at the Opening of the Diversions for the Winter, which began that Evening with the Representation of an Opera called Sylla; since which great Numbers of Foreign Nobility and Gentry are arrived here, to partake of the said Diversions. The King has conferred the Order of the Black Eagle on Prince Frederick Eugene of Wurtembourg-Stuttgart. We learn from Eisenach, that a Magazine of Gunpowder had lately blown up there, as 'twas thought by Accident; and that several Persons had the Misfortune to be buried under its Ruins.

Paris, Jan. 11. Count Stahrenberg, the Imperial Minister at this Court, arrived here three Days ago, and is to have his Audiences to deliver his Credentials next Tuesday at Versailles.

Admiralty Office, January 18, 1754.

MR. Joshua Appleby of Durham, Chemist, having discover'd an easy and expeditious Method of rendring Sea Water fresh and wholesome at Sea; and the same, on a Reference from the Admiralty, having been thoroughly examined and approved by the College of Physicians, and the Commissioners of the Victualling;

The Lords Commissioners for Executing the Office of Lord High Admiral of Great Britain and Ireland, have ordered the Process, used by the said Joshua Appleby, to be published, that so useful a Discovery may be universally known.

Put 20 Gallons of Sea Water into a Still, together with six Ounces of Lapis Infernalis, and six Ounces of Bones calcined to whiteness, and finely powdered. From this Quantity fifteen Gallons of fresh and wholesome Water may be extracted, in two Hours and a Half, at the Expence of little more than one Peck of Coals.

[Price Two-Pence.]

This

This Proportion of Ingredients will answer very well in these Northern Seas; but in some Parts of the Mediterranean, or Indian Seas, where the Water is more salt and bituminous, the Quantity must be encreased to nine Ounces of each.

The Ship's Boiler should not be used for this Process, what remains being very noxious.

January 17, 1754.

Notice is hereby given, That a General Meeting of the Trustees for the River LEE, will be held by Adjournment at the Bull Inn at Hoddesdon in Hertfordshire, on Monday the 4th Day of February next, at Ten in the Forenoon.

Bof. Toller, Clerk to the Trustees.

Notice is hereby given to the Officers and Company of his Majesty's Ship the Falkland, who were on Board at taking the Conquerant Privateer, That their respective Shares of the said Prize will be paid on Monday the 4th of March 1754. at the Sign of the Sun opposite the Pay-Office in Broad street; and recalled the First Monday in every Month, for three Years afterwards, at Mr. Cadywold's Office in the same Street, where all Business relating to the Navy is transacted.

Dr. ANDERSON'S, or, The Famous SCOTS PILLS;

ARE faithfully prepared only by JAMES INGLISH, Son of DAVID INGLISH, deceased, at the Unicorn, over-against the New Church in the Strand, London; and to prevent Counterfeits from Scotland, as well as in and about London, you are desired to take Notice, That the true Pills have their Boxes sealed on the Top (in black Wax) with a Lyon Rampant, and Three Mulletts Argent, Dr. Anderson's Head betwixt I. I. with his Name round it, and Habella Inghish underneath the Shield in a Scroll. They are of excellent Use in all Cases where Purging is necessary, and may be taken with Epsom, Tunbridge, or other Medicinal Waters.

DR. JAMES'S Powder for FEVERS, and other Inflammatory Distempers, published by Virtue of His MAJESTY'S ROYAL LETTERS PATENT, will remove (as has been experienced in many thousand Cases) any continual acute Fever in a few Hours, though attended with Convulsions, Light-headedness, and the worst Symptoms: But if taken in the Beginning of a Fever, one Dose is generally sufficient to perform a Cure.

It is likewise a most effectual Remedy for all internal Inflammation, Pleurifies, Quincies, acute Rheumatisms, and the Lowness of Spirits, and Uneasinesses proceeding from slow and latent Fevers, which are generally mistaken for Vapours and Hysterics; and a single Dose remarkably stops the Progress of a Cold, and certainly prevents the ill Consequences arising from that very common Disorder, the Source of almost all Distempers.

This Powder (which is a very safe and pleasant Medicine to take) is sold by J. Newbery at the Bible and Sun in St. Paul's Church-yard, over-against the North Door of the Church, at s. s. 6 d. the two Doses, with good Allowance to those who buy it for charitable Uses, or to sell again; and by James Eddall, Printer, on the Blind Quay, Dublin.

See a Dissertation on Fevers, and other Inflammatory Distempers, sold at the Place above-mentioned. Price 6 d.

Jan. 24, 1754.

THE Publick is desired to take Notice, That the Partnership between Joseph Collett and James Jackson, for the Vending, Selling, and Dispensing of the Medicine called Oleum Anodinum, or British Balsam of Health, is this Day mutually dissolved. Witness our Hands,

*J. Collett.
Ja. Jackson.*
